

Trade Plan

Analysis for **Nov 5, 2024**

Index Block Orders are expected at:

Time Frame: 5 min

- 10:00
- 12:20
- 13:35

Rules on how to trade these timings:

Wait for the 5 minutes candle closing and then mark its High & Low.

If High breaks you can go long with its low as your StopLoss and if the low breaks you can go short with its high as your StopLoss.

HOW TO TRADE OPTION LEVELS

1. Choose which Index you want to trade today either BN, Nifty or FinnNifty.
2. Note the opening price at the pre-open session at 09:08 in TradingView.
3. The opening price will be your ATM strike price.
4. Add both CE and PE in the watchlist and mark the ENTRY, SL and TARGETS
5. Wait for the Entry in one of the strike price and plan your trade.
6. Once entered just wait for the Target or StopLoss.
7. Book half quantity at Target-1 and trail your SL CTC or book full.
8. Execute only 2 trades a day if you have a StopLoss, **Stay disciplined.**

How to trade Stocks?

1. Add all the stocks in your watchlist before the market opens
2. Divide your capital into the No.of stocks given above
3. If there are 8 stocks and your capital is 2 Lakh... divide 2L into 8 parts, that is 2L divided by 8 = 25k
4. Trade with 25K in all the above stocks when ENTRY comes
5. Enter if price is able to sustain for 15 min above or below the above entry levels and wait for the Target
6. StopLoss will be the previous swing or the other entry line as per your risk capacity
